Boat Club Entertainment.

For a long series of years Arlington Boat Club has annually appeared before the public in some form of entertainment, frequently furnishing it from its own ranks, but occasionally employing outside talent. This was the plan this year, the quite famous "Criterion Club" taking the contract, and presenting the amusing comedy with which many are familiar, "A Night Off." The story of the play is simply the inducing an old university professor to mingle with a company of strolling players, secretly, and being discovered by the straitlaced Mrs. Blimber, some decidedly amusing situations are introduced, all being handled with skill by the talented company presenting the play, and cast as fol-

Dusk on the wide, low plain. And a glint in the foreground lying Water fringed by a ring of tremulous whispering

And over it circling bats And the sound of the killdees' crying, And around it the sigh of the wind in a network of shivering weeds.

Dusk on the wide, low plain, And a star in the distance peering Over the serried peaks of shifting, vanishing blue, And an oak tree black on the sand, And a hare loping off through the clearing, And, out where the tarweeds toss, the bleat of a wandering ewe.

Dusk on the wide, low plain, And a crane to the pools descending, soft where the mulleins wait, the flit of a ound owl's wing,

And a hawk beating home to his perch Where the clouds with the crests are blending, And shades of the hastening night round the lessening foothills cling. -William Higgs in Youth's Companion.

"When I was on the bench," relates Judge J. J. Du Bose, "we were once making up a special jury for a murder trial. The lawyers were examining the venire, and I wasn't paying much attention to what was going on till one of the lawyers attracted my attention by saying:

"Your honor, this man is incompetent for jury service. He's a foreign-

Secret Drawers.

"Most people seem to think," says a maker of furniture, "that secret drawers and hidden receptacles in furniture only exist in novels and plays, but this is by no means so. I very frequently take orders for such items, and I employ a clever woman designer, who shows positive genius in planning places of concealment, which no amount of tapping or measuring could reveal. In most cases, even were the hollow receptacle discovered, the woodwork around would have to be cut away, so complex are the fastenings. Most of the orders come from womenand rich people, of course-and I have no doubt that a desire to hide articles from too curious servants dictates the orders."-New York Tribune.

A Grave Request.

A solicitor in a Georgia court is responsible for the following:

He overheard a conversation between his cook and a nurse, who were discussing a recent funeral of a member of their race, at which there had been a great profusion of flowers. The burse said:

"When I die, don't plant no flowers en my grave, but plant a good old watermelon vine, and when it gets ripe you come dar, and don't you eat it, but jes' bus' it on de grave and let dat good old juice dribble down through de ground."-Youth's Companion.

Not Particular as to Weapons. The waiter girl knew a thing or two about table etiquette, so she sniffed scornfully as she said, "It's not our custom to serve a knife with pie."

"No?" remarked the patron in surprise. "Then bring me an ax."-Phileelphia Record.

ANCIENT ARITHMETIC.

Examples That Were Used In Egypt 3,600 Years Ago.

Probably the oldest copy book for home lessons in arithmetic was recently unearthed in Egypt. The papyrus, which was found in excellent condition, dates from the period about 1700 B. C.—that is, about 100 years before the time of Moses, or almost 3,600 years ago. It proves that the Egyptians had a thorough knowledge of elementary mathematics almost to the extent of our own. The papyrus has a long heading, "Direction how to attain the knowledge of all dark things," etc. Numerous examples show that their principal operations with entire units and fractions were made by means of addition and multiplication. Subtractions and divisions were not

Equations are also found in the papyrus. Among the examples given is this one: Ten measures of barley are to be divided among ten persons in such a manner that each subsequent person receives one-eighth of a measure less than the one before him. Another example given is: There are seven men, each one has seven cats, each cat has eaten seven mice, each mouse has eaten seven grains of barley, each grain of barley would, if cultivated, have yielded seven measures of barley. How much barley has been lost in that

The papyrus also contains calculations of area, the calculation of the area of a circle and its transformation into a square, and finally calculations of the cubic measurements of pyramids.—Philadelphia Record.

The Fate of Admiral Byng.

Admiral John Byng was the fourth son of the Earl of Torrington and served in the British navy, rising to be admiral of the red in 1748, when he was 44 years old. In 1756 he was sent with a badly equipped fleet to relieve painted upon the panels of the doors Minorca, threatened by the French, He reached Minorca after the French had got there. His second in command, Rear Admiral West, drove them back, while Byng kept his ships out of action. In a day or two he sailed to Gibraltar, leaving Minorca to its fate. He was tried for treachery and cowardice, but acquitted. The court martial convicted him of not having done his best to relieve the island, and under the application of article 12 of the British naval code of those days he was condemned to be shot. The ministers took him as a scapegoat, and he was shot on the quarter deck of his own flagship, the Monarque, in Portsmouth harbor on March 14, 1757.

A Text That Caught. The following extraordinary coincidence occurred at Tinwald recently: A young preacher, who has lately married, was planned to take the morning service, but, by a misreading of the plan, he mistook his appointment for an evening one. Consequently the congregation gathered on the Sunday morning waited in vain for his appearance. Thereupon one of the office bearers of the church present undertook the service. Totally nnaware that the absent preacher had recently married, he electrified and amused his audience by announcing as his text, "He has married a wife, and therefore he cannot come."-New Zealand Herald.

MACREADY ON THE STAGE

The Tragedian Was Not a Pleasant Man to Act With.

Macready was a dreadful man to act with. You had the pleasant sensation of knowing that you were doing nothing that he wanted you to do, though following strictly his instructions. He would press you down with his hand on your head and tell you in an under- Family Paints, Brushes, Varnishes, Rubber Hose, Garden Tools tone to stand up. Mr. Macready was a terribly nervous actor. Any little thing which happened unexpectedly irritated him beyond endurance.

One night at the Park "Macbeth" was the play. Mrs. Sloman, an old fashloned actress, dressed Lady Mac MAKING SEWER CONNECTION A SPECIALTY beth in the manner which prevailed in her early life, in black velvet, point lace and pearl beads. In the murder scene part of his dress caught on the tassels of her pearl girdle. The string broke, the beads fell to the floor softly with a pretty rhythmic sound, distinctly heard through the intense silence

This so exasperated Mr. Macready that he was almost frantic, until, with the final lines of the scene, "Wake, Duncan with the knocking, oh! Would thou couldst," he threw Mrs. Sloman off the stage, with words which I hope were unheard by the public and were certainly unfit for publication.—"Auto- Boilers Re-tubed. biographical Sketches," by Mrs. John Drew, in Scribner's.

A City With Two Carriages. There are only two carriages in town. One belongs to the archbishop, and the other carriage is the property of the government and one of the perquisites that pertain to the presidential power. It is an ordinary landau, imported from Paris in pieces and put together by local talent, and a native artist has a brilliant reproduction of the coat of arms of the republic, about a foot square, in the national colors-green, yellow and red. This is greatly admired by the populace. who see the carriage only occasionally, on state occasions, when it is drawn by four big black horses wearing harness heavily mounted with silver and decorated with rosettes, tassels and streamers of the national colors.—La Paz (Bolivia) Cor. An Illustrious Newsboy.

The guests at my table at the luncheon were Professors Gneist and Hoffman and Von Bunsen. While thus refreshing ourselves, both physically and mentally, Hoffman told the following story of Faraday, whom he had known very intimately. They were walking one day together through the streets of London, where both were then professors, when Faraday stopped a newsboy and bought a paper. Hoffman asked him why, with his house supplied regularly with all the papers he needed, he stopped to buy a paper from a boy in the street. Faraday replied, "I was once a newsboy myself and sold papers on the street."-John Bigelow's Recollections in Century.

BILLS OVER A CENTURY OLD They Show Tea to Have Been a Cambridge Student's Favorite Drink.

There is a bill for groceries, etc., furnished for an undergraduate at Cambridge in the year 1788. The bill contains one or two items of furniture. Apparently the undergraduate took over rooms already furnished at a valuation, and certain articles had to be bought new, such as a hearth brush, a pail, a mop and a "Holland gotch." One knows not what this means, but WE SOLICIT BUSINESS it cost 2 shillings 9 pence (43 cents).

> The undergraduate would seem at first sight to have consumed tea in a most reckless manner. On Oct. 24 he is charged 2 shillings for Hyson and 1 shilling 6 pence for Congo. On Nov. 1 he is charged 2 shillings for tea and on the same day, which looks odd, 6 shillings 6 pence for tea. On the 9th of the month he buys a new teapot, the old one, one supposes, worn out with hard service. However, this tea lasts him till the end of the term, so that his tea costs him for the two months no more than 11 shillings, or \$2.75, and as the price of tea at this time varied from 8 shillings to about 25 shillings we may conclude that he got through no more than a pound during the term.

In other words, this young man took for breakfast a slight repast of weak tea and bread and butter. Dinner was then served at 12, so that breakfast was only what the Indians call a "chota hazri." On sugar he spent 4 shillings, which means six pounds at 8 pence a pound. On candles he spent 24 shillings 8½ pence, or about 3 shillings a week. He burned wax candles, mold candles and "wax twist." Salt was a shilling a packet. On two occasions he bought sand. Was, then, the floor of his room sanded? It would seem so.-St. Louis Republic.

This last is Finance Block, - Mass. Avenue. in the British museum and cost over 3,000 guineas. One thousand guineas was the price

given by the late Mr. Alfred Morrison of Carlton House terrace for an autograph letter written by Marie Stuart to the archbishop of Guise. This and two other letters (one to the pope and the other to the king of France) were written by the unfortunate queen of Scots on the morning of her execution. The letter to the French king was destroyed during the days of the terror, while that to the pope is still preserved at the Vatican. The well known bookseller Bernard

Jimmy and the Baby. Jimmy's mother kept cows and sold

milk. Jimmy himself had nothing to do with the cows, though sometimes he used to carry the milk pail to his mother's customers. The customers all liked Jimmy, with his round, freckled face and bashful grin, and they used to ask him how business was, for, although Jimmy was only 13 years old, he had a business. He made coffinsbaby coffins-and sold them to the undertaker. They were nice pine coffins, with all the edges carefully joined. Jimmy received 50 cents for each one.

One day Jimmy stopped at the house of one of his mother's customers to leave some milk. A little boy met him at the door. "We've got a new baby!" said the

little boy. "Would you like to see it?" Jimmy nodded. The little boy's aunt laughingly led Jimmy to the cradle where the new baby was. Jimmy gazed at the infant for some time, speechless with admiration or some such emotion. "What do you think of it, Jimmy?"

asked the aunt. Jimmy grinned.

He did not tell his spoiled darling that he was Robert's sworn ally or that he was plotting at that very moment to secure what he thought was her happiness.

Three weeks later a two seated wagon drawn by a team of stout, though very tired, horses mounted the last hill that intervened between the railway station and the Midas mines. In the wagon were Roger Hendricks and Grace and an extremely taciturn, though highly skilled, driver, who had

Then Robert quickly stepped to the wagon, and reaching up swung he lightly to the ground.

"Glad to welcome you to the mines, Miss Grace," he said in an easy manner, with no trace of self consciousness. And what astonished Grace most of all was that he made no excuses for his decidedly unconventional garb.

"Hold on," cried the capitalist as they walked toward the superintendent's cottage. "Are you Bobsy?"

"That's what the Chinese cook calls me," laughed the young man, "and I believe the rest of the camp has adopted the title. We all have our nicknames out here, you know. But this is the superintendent's cottage. Miss Grace will take my room, and you, sir, will take Mr. Ingersoll's. The Chinese servants will serve your meals here.' "And will you not join us?" asked Grace in her sweetest manner.

"I should be pleased to," be answered simply and turned away to talk with her father.

Robert came to supper and the only changes he had made in his toilet were the removal of his slouck hat and the addition of a rough sack coat. But be was nowise embarrassed. He certainly talked well, and Grace saw that her father was greatly taken with him.

Robert went away early, knowing they were tired and presumably sleepy. As the sound of his footsteps died on the gravel walk the capitalist turned to his daughter

'Seems a little different, doesn't he?' he asked.

"Different from what, daddy?" "Why, from the whole tiresome lot of

conventional young men.' "He does," said Grace lightly.

There was a pause. "Aren't you just a little sorry now you refused him?" chuckled the old man.

"This isn't the man i refused," said Grace softly.

rapidly. Thanks to the preparations made by Robert for their coming the roughness of camp life was greatly softened. He had worked like a Trojan to make them comfortable. He had actually brought water in sluice pipes from a spring in the mountain side and fitted up a rude but very serviceable bathtub in the cottage for the use of Grace. In fact, she heard of his energy and industry on every hand. And she noticed, too, that her father leaned upon him more and more.

Once she took her parent to task a little for absorbing so much of Robert's leisure time.

"The boy is full of business," said her father shortly. "He's carrying a big load here, and there's no shifting it till Ingersoll comes back. I've been doing what I can to lighten it a lit-

Something That Practically Any Man Can Do Through Self Denial.

"There are some men of genius," said Mr. Nippingly, "who accumulate great fortunes by great strokes, but by far the greater number of fortunes, including those of moderate dimensions, and these form the great majority of all, are made by the very simple process of living within one's income and investing the surplus with more or less wisdom, but always where it will be safe.

"The older I grow the more amazed I am that more people don't lay up a competence for themselves, as most anybody can do, by beginning early in life to live within their income and sticking to that course faithfully. Jackson's Day in Chicago, where the "16 to 1" issue was formally buried, the Times-Herald says editorially: -

"The issue was dead beyond recusitation three years ago, but not until the banquet of the Bryan League on Saturday night was there any formal recognition of its demise. The interment of its remains took place without a single protest from the followers of Bryan who sat around the festal bier. In fact, the silver leader himself heard the clods of oblivion fall upon the coffin without uttering a moan. No one asked to see the burial certificate. There was no disposition to go behind the remains. Evdiences of glad relief over its final interment were apparent on every hand."

Eleanor Worthen, Mr. George Foster, Rev. vard, to mourn the loss of the last of the old Mr. Cochrane.

Mrs. Roberts, of Arlington, gave a reception for Miss Annette Frizelle, of our village, A Prightful Blunder at her home last Saturday evening. Miss Annette Frizelle, Mrs. James H. Frizelle and Mrs. Roberts received the guests and the pro-

place at Madam Locke's residence, Friday gists. evening, and she was assisted by Mrs. A. Bradford Smith. After enjoying a short time in sociability, about thirty were seated at the dining tables. The divine blessing was invoked by Mrs. Cochrane and then Mrs. Blanchard read a bright, original poem of welcome, which was heartily applauded. The menu was tomato soup, crackers and jelly, roast turkey, cranberry sauce, with mashed potatoes, squash and maccaroons, with cheese, hot rolls, coffee, ice cream and sherbet, with assorted cake and fruit. During the evening the guests were refreshed with delicious frappe, candy, salted peanuts, crackers and cheese. After the physical man had been strengthened, the roll was called and each member responded with a memory gem appropriate for the New Year. Miss L. M. Brigham read a paper on Elizabeth and Rob-ert Browning and then we listened to piano selections from Mr. Quincy Blanchard and Miss Henrietta Locke. Mr. Fabius Blanchard sang a solo with pleasing effect, Mrs. Blanchard read "Peter Mulrooney and the Black Filley," the piece being finely interpreted and very amusing. The matching advertisement game was entered into with much spirit and if our listening ears heard aright, Mr. Frank Locke was the most successful, having the greatest score. All were homeward bent ere the wee small hours of morning, after having been fed physically and intellectually.

Died in Whitinsville, Mass., Jan. 8, 1900, Mr. Carlton A. Childs, of East Lexington, aged 34 years, 7 mos. and 18 days.

Mr. Carlton A. Childs was born in East Lexington, May 20, 1865, and was the second son of Augustus and Eliza Ann (Blodgett) Childs. He attended our schools and also the High school and early manifested an interest in the stage and enjoyed music, but his father seemed to imperatively need his help in the store and post-office and he relinquished his hope, at least partially, of becoming an actor and followed the dictates of duty. After his father's death, nearly five years since, he became post-master and engaged in the grocery business, but his heart still yearned for the stage and last summer he played with the "Effie Carlton Red Letter Day Company," a travelling troupe, and was in Maine several weeks. Last fall he decided to go with this company on their travelling tour, and if he found it, after trial, advantageous and congenial, to make it a permanent vocation. He had acted with the company in many towns and cities in this and other states, but a few weeks since he was taken ill with typhoid fever at Whitinsville, Mass., and was obliged to remain there with strangers; but he was kindly ministered to and had excellent doctoring and nursing and it was thought he would recover, until last week, when a change came and he died on Monday, away from home, which made it doubly sad. The great kindness of the family, doctor and nurse, who were all strangers, deserve special mention and also some of the residents of Whitinsville manifested the true Christ spirit by visible tokens of interest in Mr. Childs and all speak of his patient endurance and thoughtfulness of others. His funeral occurring on There ernoon, at the church, was too late for ive an account in this issue, which we at week. As an old friend of Mr. and in view of his being so strongly

So long as the mind is in a healthy condition each little cell, or brain octopus, attends to its business faithfully and gives no trouble, but as man generally is an animal who usually refuses to live the life spanned out by nature and adopts instead the life laid down by the modern artificial process of living, instituted for sooth by civilization, mental disturbances frequently arise through the brain becoming abused in various ways, from overwork and alcohol principally.

Lord Lansdowne Visits Turner. No one was admitted to Turner's

house in Queen Anne street unless specially invited. There was a sort of little iron grille in the center of the front door, through which the old housekeeper used to look and see who was there. As an example of the rarity of visitors the late Lord Lansdowne, who was a great lover of art and a friend of Turner's, told me that after receiving no answers to his letters he resolved to beard the lion in his den. He therefore went and knocked at the door, when a shock head appeared at the iron grating, and its owner called out,

"Cat's meat, I suppose?" "Yes, cat's meat," answered his lordship and squeezed himself in.-'Millais' Life of Turner."

One of the prized curios of the Philadelphia mint is a coin which is 2,000 years old and which was coined at the ancient mint of that other Philadelphia of the far east mentioned in the Bible. It is still in good condition, and the inscription is perfectly legible. The design on the face of the coin bears a striking resemblance to the Goddess of Liberty of our own currency, and underneath is the one word "Demos," which means "the people." On the other side is the figure of Diana, with her bow arched, and the inscription, "Diana, Friend of the Philadelphians." When this coin was struck off, Philadelphia was the most important city of Lydia. The prize was picked up in Europe by Joseph Mickley, a celebrated Philadelphia violin maker and numismatist of high repute, who presented it to the mint.—Philadelphia Record.

TO THE EDITORS: - For a few days the people of the town, particularly parents of children attending our schools, have been needlessly alarmed over the reported probability that the Board of Health would order the schools closed on occount of the prevalence of diphtheria in the town.

During the last three weeks this disease has been reported officially by the medical profession in only a single case. It seems a pity that our Board of Health should thoughtlessly occasion unnecessary alarm in our community. To Prevent Cracking

Many a man spoils his temper for the whole day with poor laundry work-rough edges and "cracked" linen are often the source from which the trouble springs. Linen will crack in time, but it can never crack so soon when it is turned with a flatiron after the part that's turned has been moistened.

If you have never visited this Hand Laundry, we cordially invite you to do so and to inspect the various processes of the HAND WORK. Hand work alone properly applied prevents the annoying cracking of your collars and cuffs-ESPECIALLY YOUR COLLARS. Think of the money you save and the satisfaction you gain with a flexible finish, no rough edges, no "crackings" of your fine linen. Bathrooms Are Luxuries.

But they are not as expen sive as some people think. It is surprising how little it costs to put a bathroom in a house. Take a large closet or alcove, sheathe it up, put in a nice porcelain lined tub, have "open" plumbing, stain the walls and varnish them, and you have a nice bathroom at a reasonable cost, probably less than two hundred dollars. If you have a house for rent you cannot expect to let it in these days unless it has a bathroom; at any rate you could get enough more rent to pay you to put one in. Every house that we have built in recent years has had a bathroom, and we have made all kinds and sizes. If you contemplate putting one into your house or fixing up one you already have, let us talk with you about it. We charge you nothing for advice and ideas. We do all kinds of job work. > "Many designs were submitted for the H. Kitson of Boston, the noted sculptor, structure which is a high tribute to the sculptor's skill. The foundation of the fountain is of solid granite and is set under ground. On this base is the superstructure, consisting of rough field stone, the central mass being twenty feet high from the base. Reaching out from the main body on either side for several feet are breastworks three feet high, which also are built to the rear at right angles from the body of the fountain. Nearly 200 tons of stone were used in this construction, all of the material, with the exception of the granite, being collected in Lexington and nearby towns, great care being taken in selecting the bowlders to be used. Surmounting the rugged pile and in keeping with the idea em-braced in the whole work, is a brouse figure representing Capt. John Parker, who commanded the minute-men on Lexington common on that eventful 19th of April, 1775. The figure is of heroic size, eight feet, six inches in height, and weighs 1400 pounds. It was designed by Kitson. The rough field stone base serves in a measure to typify the pedestal with the sturdy, rugged, liberty loving people of those early days, while the figure is a most artistic conception of a type of those heroic men of Middlesex who gave up their lives that the nation might live. The figure faces to the south, looking toward product and a valuable contribution for those who make Browning and his works a study and are always accumulating such information with profit and interest. An attractive spread was served from the dining room at the conclusion of the paper. Mrs. Edward P. Merriam and Mrs. James P. Prince poured, seared at either end of the table. Another rare treat was afforded by the rendation of the balcony scene from Cyrano de Bergerac, by Mr. Leland T. Powers, who was quite in his element in the character study and made the scene fully worthy of his exceptional talents as a dramatic reader. A more choice program or select gathering has rarely been enjoyed by
